

Target Group

Organizations, small/medium companies, that enter up to 25'000 externally delivered financial transactions manually into their own financial-/securities systems.

Today's situation

- process transactions manually
- average transaction time 3-5 min.
- high failure
- high costs
- limited scalability
- limited flexibility
- delayed „reporting“
- delayed „closing/processing“

Business drivers

- lack of resources
 - cost pressure
- cost-effectiveness
 - scalability
 - flexibility
 - ROI
- results

Solution approach

Integrate your custodians financial data electronically with your financial and securities systems for immediate data availability.

Customer benefit

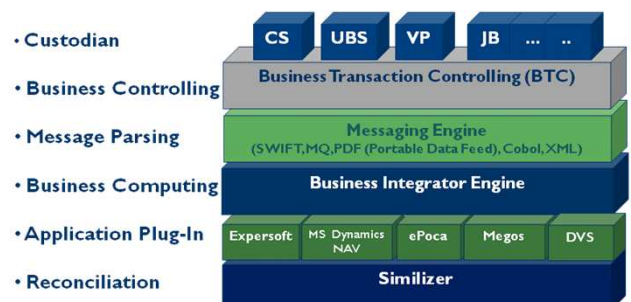

- fast, automated and secure financial transaction processing
- cost reduction per transaction by more than 90%
- unlimited scalability
- enable up to date reporting through immediate data availability
- faster and easier closing due to immediate data processing and availability
- precise processing
- high flexibility
- fast integration of additional custodians

Solution Business Integrator™ light

Since more than 10 years infynys systems AG successfully realizes automatic integration and enrichment of electronic financial data. We enable our customers to integrate automatically external financial transactions with their financial and securities systems.

The modular concept of our unique software solution Business Integrator™ „light“ enables fast and quick connection to your custodians. For various custodians we offer out of the box plug-ins. Just connect and run them. Our message engine analyses the externally delivered financial messages (e.g. SWIFT, Legacy) before transferring them into our core engine Business Integrator™. The specific enrichment of these data for your target financial-/securities systems will be automatically processed by Business Integrator™.

Our Business Integrator™ „light“ uses a „blackbox“ approach. infynys systems provides you with the complete configuration, setup, customizing and integration of the system. You don't need to invest in IT-specialists. infynys provides you a complete service. Focus on your core competence, don't care about IT. Be more efficient by saving costs and build the foundation for almost unlimited transaction processing. Protect your investment by getting the right to upgrade to Business Integrator™ Full Server license.

Business Integrator™ „light“ functionalities

- blackbox approach
- system configuration by infinys systems
